Affordable, Quality Palestinian Developers

By using this resume and contacting the candidate, you agree to the terms of hiring developers through Joint Tech or direct hire while paying Joint Tech's commission as written in its offices.

JOINT TECH

[Affordable, Quality Palestinian Developers]

Why work through Joint Tech?

1. We, through partnership with manpower company, deal with permits to come to Israel and work. We deal with all the bureaucracy regarding employing a Palestinian. You focus on your success. Direct employment might be also an option if you like.
2. Within the process of issuing an entrance permit to Israel, every employee goes through a security check by the Shabak.
3. Satisfied with the developer you received from us? We can look for more!
We make tremendous efforts to match the right Palestinian developers with your needs. We test and filter developers. We look for personal quality, people with a good attitude that can work around and solve issues, whether they are Juniors or Seniors.
4. Palestinian developers are much more affordable than Israelis. As opposed to offshore, they can work side by side with you, hence you can enjoy the productivity and the experience of in-house team developers.
